

5TH MOUNTAIN WARFARE CONGRESS

VERTICAL MANOEUVRE IN MOUNTAIN WARFARE

02-06
OCTOBER
2023

NATO MOUNTAIN WARFARE
CENTRE OF EXCELLENCE

► **Background**

Mountain Warfare (MW) always requires a high degree of agility and flexibility. These necessary parameters can only be achieved through the mastery of various mountain techniques and their consistent application.

This way, the advantages offered by the mountainous environment can be fully exploited and the necessary superiority in mobility can be achieved.

At the same time, one must open up to new opportunities and bring these new possibilities to arise very quickly.

► **Vertical Manoeuvre in Mountain Warfare**

The three-day Congress will thus offer the interested public a platform and share the experiences of the different nations in this field.

The Congress will provide them with the opportunity to examine the different aspects together. Experts from different nations will present their experiences.

► **Central idea**

According to the basic function of the NATO COEs, the NATO MW COE will provide the Community of Interest with recognized deeper knowledge and real-life expertise in this field and experience from different points of view.

The Congress as a platform creates an opportunity to combine knowledge and experience from a range of experts.

Speakers

All the nations represented in the NATO MW COE will endeavour to present their countries' experts on this topic, and these experts will be very pleased to share their experience and research results with you.

In addition, during the Congress, there will be the opportunity to discuss these experiences together and to seek information during the panels.

The theme will be discussed intensively during the three days, and suggestions can be incorporated into the future training of mountain soldiers. This will further increase the performance of mountain soldiers and expand their range of operations.

Presenters

At this congress, we will complement the lectures with the necessary practical demonstrations.

Emphasis will be given on presenting these innovations in combination with new technical possibilities that all participants can draw their own conclusions which can be extensively discussed.
