

# **5th MOUNTAIN WARFARE CONGRESS 2023**

**Monday, 2 October 2023 - Friday, 6 October 2023**

**Brdo pri Kranju**

## **Scientific Programme**

## **5 th MW Congress: VERTICAL MANOEUVRE (VM), Monday, 02 OCT**

Mountain Warfare (MW) always requires a high degree of agility and flexibility. These necessary parameters can only be achieved through the mastery of various mountain techniques and their consistent application.

This way, the advantages offered by the mountainous environment can be fully exploited and the necessary superiority in mobility can be achieved.

At the same time, one must open up to new opportunities and bring these new possibilities to arise very quickly.

The three-day Congress will thus offer the interested public a platform and share the experiences of the different nations in this field.

The Congress will provide them with the opportunity to examine the different aspects together. Experts from different nations will present their experiences.

According to the basic function of the NATO COEs, the NATO MW COE will provide the Community of Interest with recognized deeper knowledge and real-life expertise in this field and experience from different points of view.

The Congress as a platform creates an opportunity to combine knowledge and experience from a range of experts.
